Profile cutter PPS BASIC I/M

The outstanding feature of the PPS BASIC I/M is its compact size (Dim. L x W x H: 150 x 60 x 180 mm) and the low weight of just 8.3 kg.

The common EN mounting rail profiles

- NS 35/15,
- NS 35/7,5,
- NS 15

and the neutral busbar NLS-CU 3/10 can be cut accurately and practically burr-free.

The PPS BASIC I/M is equipped with a 1 m long measuring bar, with both inches and millimeters engraved. The length of the mounting rails to be cut can be set precisely with the aid of a stop. The locking facility of the stop makes a rational job of cutting any number of mounting rails to the same length.

With the aid of the lever rod, rail profiles can be cut with a minimum of force and within seconds. After cutting, the hinged limit stop is folded to the side and the cut rail removed from the back without any great effort.
